1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-15 and 17-29, drawn to method of making microcapsules by polymerizing around droplets, classified in Class 523, subclass 211.

II. Claims 16, 30 and 31, drawn to microcapsules and copy papers with microcapsules, classified in Class 503, subclass 215.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the microcapsules of Group II need not be made by the methods of Group I but may be made, for example, by the methods of Rourke cited on page 4 of the specification or by sorting microcapsules by size through membranes after their formation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as

Serial No. 10/099757

shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
